Description

TH300 Thermistor Thermometer with Stainless Steel Probe and 1 meter cable

Remote temperature measurements require a versatile thermometer with a remote probe that can be used in hard-to-reach spots.

The meter must also be easily readable at an angle.

TH300 is equipped with a stainless steel general use probe and 1 meter cable to make remote reading a simple task.

Thermometers: TH300

Ordering information:

TH300 is supplied with stainless steel probe with 1 meter cable, batteries and instruction manual.
