Description

TH310 Pocket Thermometer with Stainless Steel Probe

Scientists and laboratory technicians rely on the accuracy of their thermometers when performing routine measurements. For this reason, Milwaukee developed the TH310. This palm-sized unit is a highly accurate thermometer that is destined to make glass thermometers obsolete.

TH310's features:

- Easy-to-read LCD displays clear reading at any angle
- Wide measurements range: -50.0°C to +150.0°C
- Fast response with a high-tech NTC thermistor sensor
- Up to 3000 hours of battery life
- Stainless steel probe resists aggressive environments

Thermometers: TH310

Ordering information:

TH300 is supplied with stainless steel probe with 1 meter cable, batteries and instruction manual.
