Description

Mi407 Ammonia (Low Range) Professional Photometer

This user-friendly Colorimeter will give you direct readings in mg/L. Ammonia detection in water treatment systems is particularly important for aquarium owners and fish farm operators.

Ammonia is highly soluble in water and extremely toxic to fish. Fish farm owners must monitor and maintain careful control of ammonia levels to ensure optimum water conditions for their stock.

Milwaukee offers the Mi407 microprocessor-based instrument with greater resolution, better accuracy and immediate results for measuring low concentrations of Ammonia (from 0.00 to 3.00 mg/L).
